IV. **New Business**:

1. **Lake Level Control Structure**: (Rex) Moving forward with data monitoring. Additional piezometers near Control Structure. Kiser & Associates will install in Spring. Structure not leaking. Ground water flowing into creek. Fall measurements showed an uptick in flow downstream of the control structure.
2. **Augmentation**: (Rex) Provided info on Part 307-Inland Waters (Part 324.30708 (1) and (2). CLIB funding preliminary feasibility study-report will be out January 2022. (Jeff) suggested well in Iosco County since that area has municipal water source.
3. **Weed Control**: (Rex) Good 2021 season. Treated 31 acres (3%) of 1,110 total acres. No huge increase of growth with lower lake levels.
4. **Swimmers Itch**: (Gary) Rather quiet year, the number of Geese is way down. Larger number of Swans may have scared the Geese away.
5. **Dredging**: (Rex) CLIB Update. Several sediment samples taken within Cedar Lake. Two (2) came back above the action level for dredging, however not above health concern level. Cost of project with Special Landfill would far exceed values of project.
6. **Website**: Discussion creation for improved AICLA communication and informational update to membership. Motion by Rex to develop website not to exceed \$2,000. Support Chuck. 11. AICLA Picnic: Jeff will research use of the LSPOA Pavilion for an AICLA Picnic. (July 23rd of July 30th). Burgers, Hot Dogs and Chips. Grow membership and communication with membership.
12. Communication-Email: (Jeff) Expectation is to monitor AICLA email twice a week.
